

Training discussion

# What do we have so far?

- Nothing (well, not quite)

# 3 Kinds of documentation found in mature open source projects

- **Tutorials** — many possible forms
  - ppt slides
  - Videos
  - Web sites with extended examples...
- **Users' Manual**
  - ENDF manual is a good example
- **Specifications/API documentation** — This is what we are working on for SG-38 & SG-43

For new  
users

For mature  
users

For  
developers

# Given the complexity of nuclear data, workshops are a good idea

- RSICC (US)
- NEA
- IAEA
- various meetings

# This is a lot of stuff...

- I propose we appoint a Training Lead to coordinate (not me!), volunteers?
