

Ten years after the Fukushima accident... where are we?

Olivier Gupta
WENRA's Chair, ASN's Director General

OECD/NEA – Webinar on the occasion of the report
« 10 years after Fukushima »
3rd March 2021

Ten years after the Fukushima accident

1. Main learning from the FKS accident in terms of safety is the need for more resilience for facilities and organizations:
 - increase the margins (design);
 - get prepared to manage severe situations (organization).
2. Regulations have been updated afterwards
Such as WENRA SRLs

Ten years after the Fukushima accident

3. Such an accident speeds-up changes: the impossible becomes possible.
4. The Fukushima accident has increased openness and international exchanges.

Thank you

Olivier Gupta
WENRA's Chair
